Full Stack Developer

Root4Tech "Project ePRO Print Estimating"

📅 Jan 2021 – Oct 2023

- Revamped website UI/UX using ASP.NET and ReactJS, yielding a 100% boost in user engagement.
- Managed live deployment of system updates, ensuring seamless customer experience.
- Proficient in MySQL queries and MERN stack development, enabling responsive and scalable web applications.
- Designed and implemented RESTful APIs for seamless frontend and backend communication, enhancing system performance.
- Conducted database comparisons, restorations, and implemented backup strategies for minimal downtime.

React Js. Developer

Tech Lift "Project CRM Website"

📅 Feb 2020 – Dec 2020

- Collaborating with UI/UX team to enhance application design and implement new features.
- Implementing state management with Redux for enhanced data handling in the application.

Mern Stack Developer (Internship)

PNY Training Institute "Project E-Commerce Store"

📅 Aug 2019 – Jan 2020

- Contributed to MERN stack development as an intern, gaining hands-on experience with MongoDB, Express.js, React.js, and Node.js.
- Successfully integrated RESTful APIs during the internship, optimizing data flow and communication in MERN stack projects.

SUMMARY

I am proficient in all aspects of MERN stack development and Asp.Net, including MongoDB, React.js, Express.js, Node.js and SQL. I have experience in both front-end and back-end development, and I am comfortable with database design and development using MongoDB and SQL. My approach to software development is centered around clean, maintainable code that can be easily tested and adapted. I am committed to continuous learning and growth, and I stay updated with the latest trends and best practices in software development.

SKILLS

HTML 5 CSS3 Javascript ReactJS .NET
ReduxJS Tailwind CSS NodeJS Muuri JS
Bootstrap 5 JWT Token MVC AJAX SEO
Microsoft SQL Restoring Database Asp.Net
Sql Database Compare REST API GraphQL
C # Microsoft Office Database Administration
React Native Angular JS

TOOLS

Jira Vs Code Toggle SLACK Postman
Sql Compare GitHub

STRENGTHS
